Project Design Phase-II Technology Stack (Architecture & Stack)

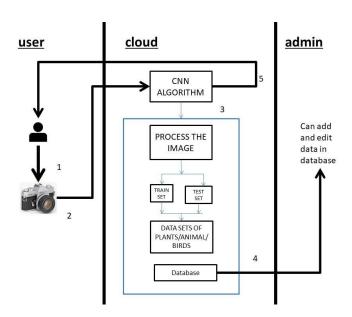

| Date | 15 October 2022 | |
|---------------|---|--|
| Team ID | PNT2022TMID25592 | |
| Project Name | Project - Digital Naturalist – AI Enabled tool for | |
| | Biodiversity Researchers | |
| Maximum Marks | 4 Marks | |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 2

Example: Order processing during pandemics for offline mode

Reference: https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/

Guidelines:

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

Table-1: Components & Technologies:

| S.No | Component | Description | Technology |
|------|----------------|---|---|
| 1. | User Interface | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | HTML, CSS, JavaScript / Angular Js / React Js etc. |
| 2. | Camera | Capture photos for processing | Normal phone camera |
| 3. | CNN algorithm | For processing the photos | - |
| 4. | Database | Data Type, Configurations etc. | MySQL, etc. |
| 5. | Cloud Database | Database Service on Cloud | IBM DB2, IBM Cloudant etc. |
| 6. | File Storage | File storage requirements | IBM Block Storage or Other Storage Service or Local Filesystem |
| 7. | External API-1 | Location service | Location or google api |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|--------------------------|---|---|
| 1. | Open-Source Frameworks | Datasets,api etc | Sql or csv |
| 2. | Security Implementations | List all the security / access controls implemented, use of firewalls etc. | e.g. SHA-256, Encryptions, IAM Controls, OWASP etc. |
| 3. | Scalable Architecture | Justify the scalability of architecture (3 – tier, Microservices) | Python, Mysql |
| 4. | Availability | Justify the availability of application (e.g. use of load balancers, distributed servers etc.) | Python, Mysql |
| 5. | Performance | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | - |
